In regard to claim 23, the prior art of record does not fairly teach or suggest, in combination with the other limitations of the claim, identifying speech segments from a noise component as a function of conditional comparisons of at least one of historical voice activity detection values, historical signal values, and noise step values.

In regard to claim 35, the prior art of record does not fairly teach or suggest, in combination with the other limitations of the claim, a noise step detector that detects and attacks a noise increase or decrease as a function of conditional comparisons of at least one of historical voice activity detection values, historical signal values, and noise step values.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
